Sample Label. Please see package insert for complete prescribing information.

Enoxaparin Sodium Injection, USP

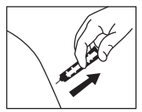

Directions for Use of Enoxaparin Sodium Injection, USP Single Dose Syringe with Automatic Safety Device:

1. Remove the needle shield by pulling it straight off the syringe. If adjusting the dose is required, the dose adjustment must be done prior to injecting the prescribed dose to the patient.

2. Inject using standard technique, pushing the plunger to the bottom of the syringe.

3. Remove the syringe from the injection site keeping your finger on the plunger rod.

4. Orienting the needle away from you and others, activate the safety system by firmly pushing the plunger rod. The protective sleeve will automatically cover the needle and an audible "click" will be heard to confirm shield activation.

5. Immediately dispose of the syringe in the nearest sharps container.

NOTE:

- The safety system can only be activated once the syringe has been emptied.
- Activation of the safety system must be done only after removing the needle from the patient's skin.
- Do not replace the needle shield after injection.
- The safety system should not be sterilized.
- Activation of the safety system may cause minimal splatter of fluid. For optimal safety activate the system while orienting it downwards away from yourself and others.

NDC 63323-**655**-99 **Rx only**

Enoxaparin Sodium Injection, USP

120 mg per **0.8** mL
